

LYNX NETWORKS

Proven experts
in IT infrastructure

Faster, better, more reliable IT infrastructure from Lynx Networks

Lynx Networks has 20 years experience in delighting customers with industry-leading quality and reliability in all aspects of PC networking. Our team of over 30 in-house technicians are trained and qualified in technical expertise and customer service, so the whole process of dealing with anyone from Lynx Networks will run as smoothly and efficiently as your newly installed IT infrastructure.

By using our own technicians we can confidently guarantee you the very highest levels of quality control, availability, expertise and flexibility.

Investment in expensive hardware can be wasted if sub-standard infrastructure reduces performance capability. By designing networks that deliver exactly what your business needs both today and tomorrow, Lynx Networks can eradicate downtime and enable movement of data with optimum efficiency across a secure architecture that is ready to grow when you are.

Why settle for less?

Unrivalled expertise

Investment in our team has secured accreditations you should demand from any provider of IT infrastructure. These include ISO9000, Investors in People, Microsoft Gold Partner, Cisco Premier Partner and BICSI Platinum Contractor.

PC NETWORKS

With our thorough understanding of the power of core networking technologies, we can build a resilient network that will support the latest revenue-generating applications. We will ensure it has the bandwidth you need and gives priority to your time-sensitive traffic.

CABLING

You have a choice of cabling systems to match your budget and bandwidth requirements. With every installation completed by fully qualified technicians, we guarantee to be on site the next working day in the unlikely event of a failure within 10 years.*

* Full T's and C's of our Rapid Response Guarantee are available.

IT SUPPORT

Take advantage of the experts at Lynx Networks to support your day to day operations and to implement new IT solutions. Our flexible support can be tailored to your needs and budget and can dramatically improve the health of your company's network to virtually eliminate downtime.

TELEPHONY

With voice and data traffic converging, Lynx Networks offers a one-stop solution. Our experience and product portfolio includes Siemens, Panasonic, Cisco, 3Com, InterTel and Ericsson. As experts in IP technology, we provide telephone systems and IT networks that work in unison.

WIRELESS NETWORKING

A member of our dedicated wireless networking team can carry out an in-depth site survey to identify your organisation's needs and the optimum solution. By using equipment that will match the final installation, we determine the correct antennae to use and the optimum

Headache free IT is one step away

Our approach is consultative and advisory, not hard sell, and we will never recommend you buy something you don't actually need.

So if you are unhappy with the amount of downtime on your network, frustrated at a lack of support from your suppliers or simply fed-up with an IT solution that only puts short-term fixes on long-term problems, get in touch with Lynx Networks today.
